Instructions:

- In Visual Studio Code, write the code that accomplishes the objectives listed below and ensures that the code compiles and runs as directed.
- a new repository on GitHub for this week's assignments and push this document, with your project code, to the repository.
- Include the URLs for this week's repository and video where instructed.
- Submit this document as a .PDF file in the LMS.

Coding Steps:

- ☑ Create a menu app as seen in this week's video. What you create is up to you as long as it meets the following requirements:
- ☑ at least one array.
- ☑ Use at least two classes.
- ☐ menu should have the options to create, view, and delete elements.
